

halebrown

Introduction

Hale Brown was formed in January 2013.

Previously, Matt Hale was an associate at award-winning commercial practice Buckley Gray Yeoman for 7 years, completing a variety of projects for clients such as F&C Reit Asset Management, La Salle Investment Management, Stanhope and RBS.

Simon Brown was sole director of Simon Brown Architecture for the last 4 years, building it up into a successful practice with strong residential and aviation clients. Before forming SBA, Simon worked at 3W Architecture working on

high-specification residential, commercial and aviation projects.

The aim of the new company is to provide clients with an energy and focus on delivering their projects, with design that is spatially elegant, economically appropriate and environmentally responsible.

We pride ourselves on building and retaining good client relationships and our level of repeat work is testimony to the quality of our product, both in terms of design and value to the client.

houses

The Drive | Kingston

This 9,000 sqft family house and covered swimming pool has just completed on the Coombe Hill Estate in Kingston.

The main house is split centrally in both plan and section, creating a full-height volume through the house and a direct link from the front door to the extensive rear garden and pool house.

This top-lit hall separates the first floor spaces with bridge links across from the parents and guest bedrooms on one side to the children's bedrooms and playroom on the other side .

Eaton Park | Cobham

This 8,000sqft new-build contemporary house was completed in Summer 2015. Despite difficult planning restrictions, the design approach has been to emphasise strong horizontal elements, in particular the upper storey, thereby creating a simple elegant building form that sits well within the surrounding landscape.

A pitched, hipped, slate roof is in keeping with surrounding buildings, but the privacy of the rear elevation allows for a more contemporary approach, introducing greater proportion of glazing and views over the landscaped back garden and pool.

First Floor

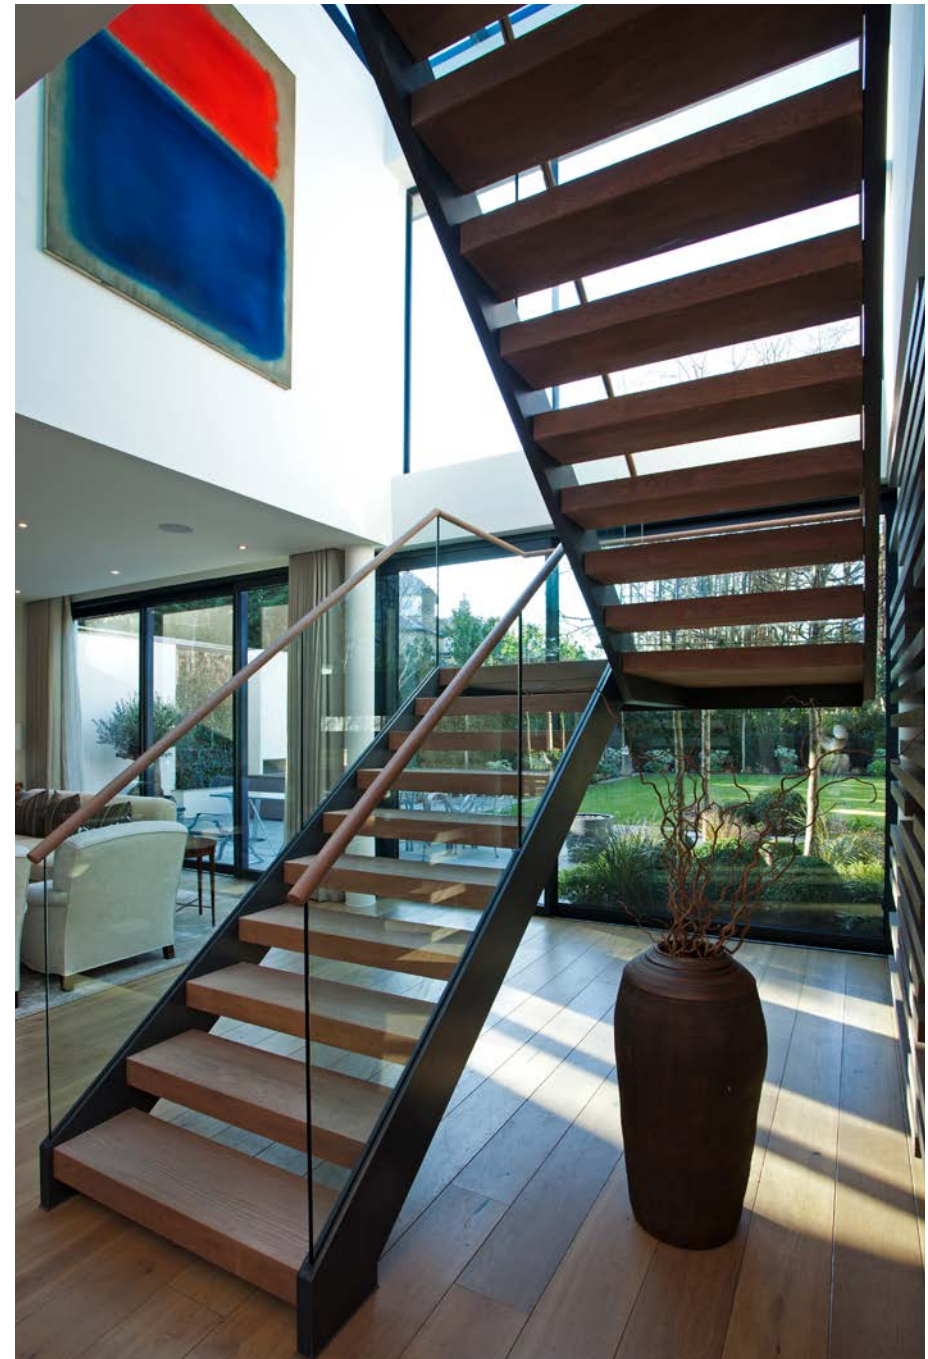

Coach House Lane | Cobham

This contemporary detached house, near Wimbledon Village, London as just been completed for a private client.

The design for the building is generated from a response to the nature of the site, its constraints and opportunities. The volumes of the building and strong horizontal elements have been emphasised with a lightweight upper timber clad storey that floats above a rendered masonry plinth.

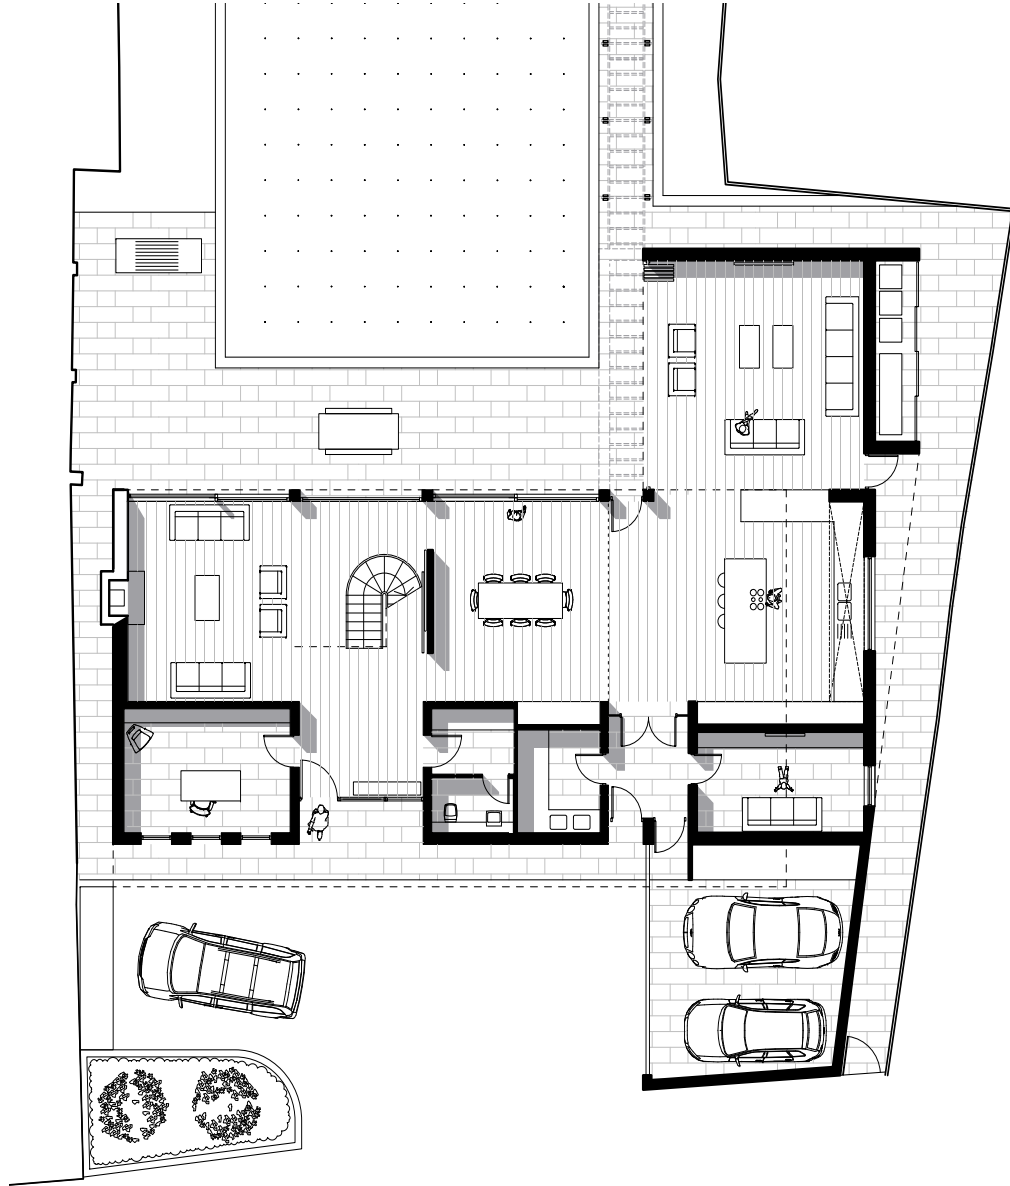

The cantilevered steel and timber central staircase acts as a piece of sculpture, around which the main living spaces open out.

Grosvenor Court | Wimbledon

Construction is almost complete for this residential scheme providing a 2-bed flat over 9 replacement garages within the West Wimbledon Conservation Area.

The contemporary building is modest in its approach, responding sensitively to an unusually shaped triangular infill site, formerly garages.

Vertical timber cedar cladding boards create a homogeneous organic form hiding the usual clutter associated with long lines of garage doors.

A green roof will dramatically improve the aspect from surrounding flats, whilst vertical louvers will mitigate overlooking

Ridgeway Gardens | Wimbledon

A new build 6,800sqft 6-bed family home located within the Wimbledon West Conservation Area, and close to Wimbledon Village.

Completed in 2015, the scheme was heavily informed by the proportion and detailing of the adjacent houses whilst responding to its unique position at the end of the row.

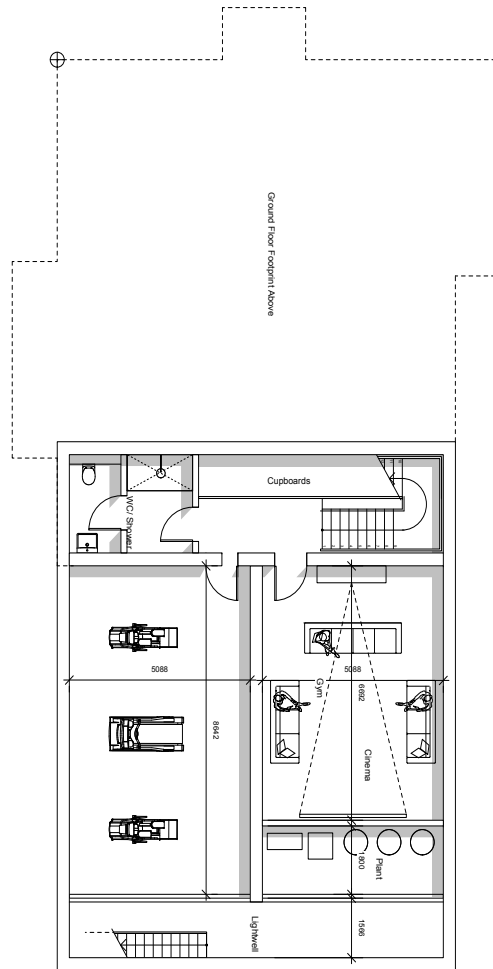

The rear elevation responds to the front elevation, but also allows for a more modern interpretation with large openings at ground floor that are informed by the modern open plan living spaces within.

Pixham | Dorking

Pixham, is a new 5,200sqft family home lying at the foot of Box Hill, Dorking on the site of an existing dog training centre.

The site lies within a metropolitan green belt and the Surrey Hills Area of Outstanding Natural Beauty and as such falls under The National Planning Policy Framework paragraph 55 for remote houses set in the greenbelt.

The design of the over sailing green roof canopy serves to hide the proposed elevations from the elevated views on Boxill, as well as reducing light pollution to these areas at night.

The house will achieve 'carbon neutral' efficiency.

halebrown architects

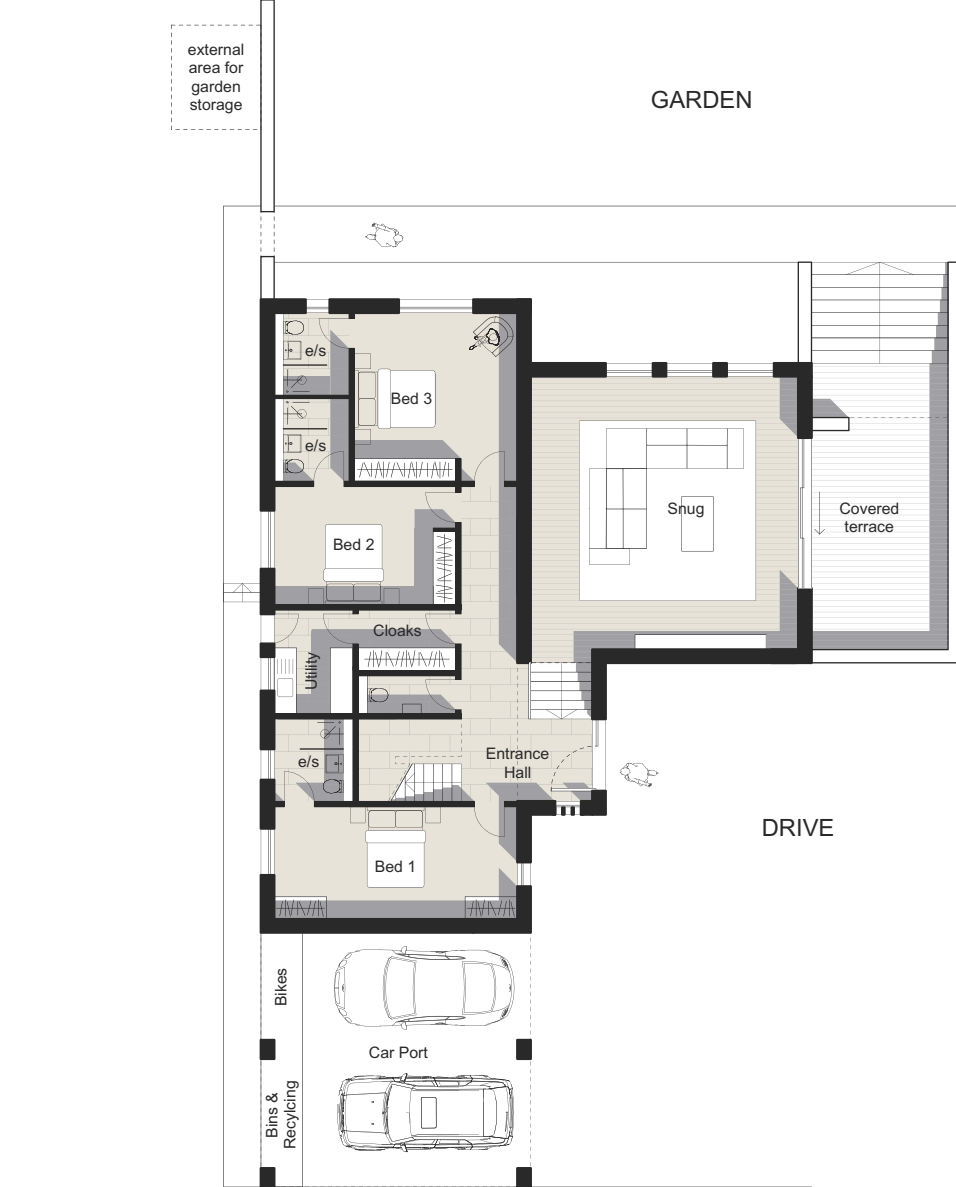

Pixham | Dorking

This new proposal for Pixham started on site in January 2018.

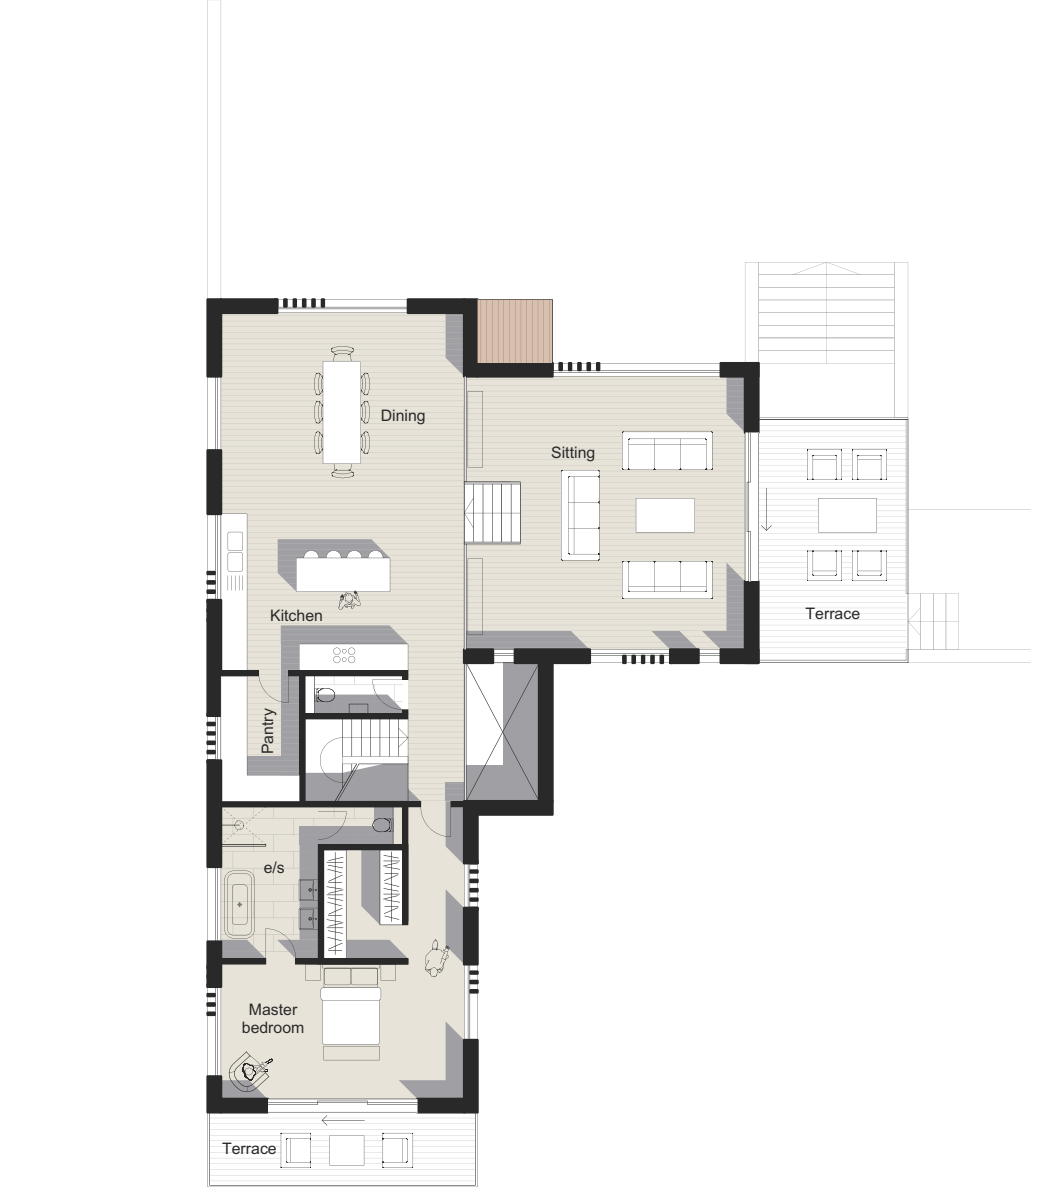

Pixham, is a new build 5,200sqft family home lying at the foot of Box Hill, Dorking on the site of an existing dog training centre.

The site lies within a metropolitan green belt and the Surrey Hills Area of Outstanding Natural Beauty and as such falls under The National Planning Policy Framework paragraph 55 for remote houses set in the greenbelt.

First

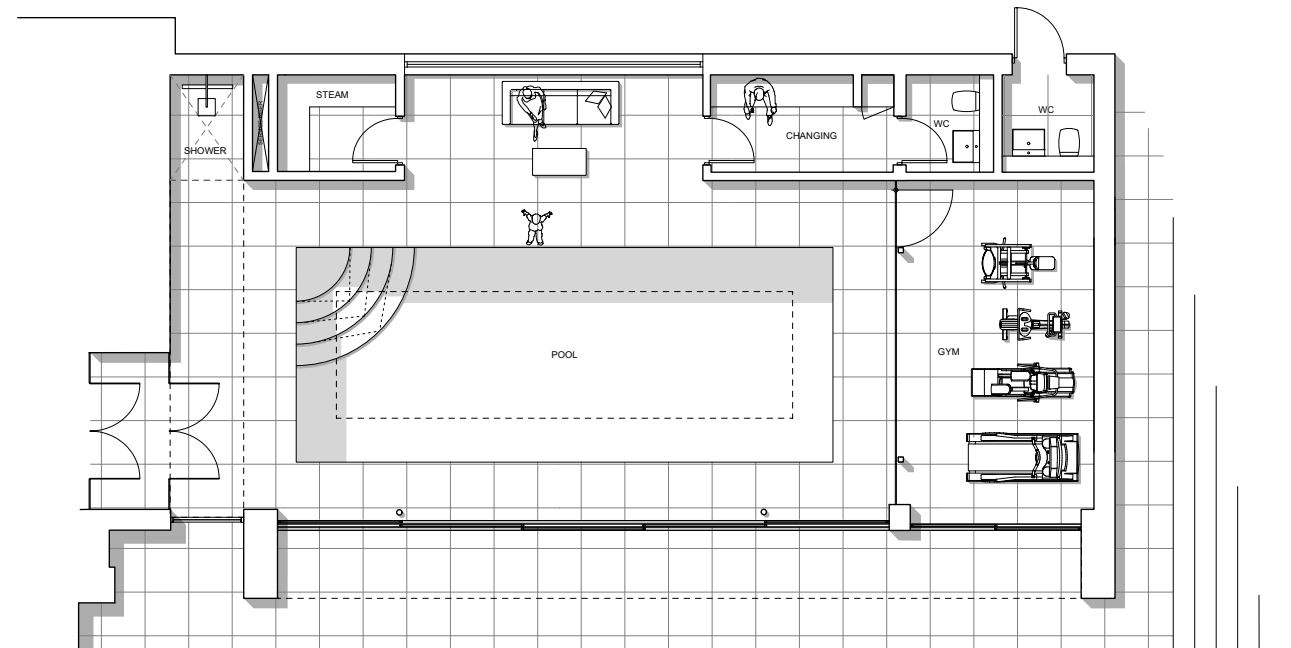

Kings Chase | Crown Estate

This contemporary 1,500sqft pool house and gym, clad in Bronze panels was completed in August 2016.

The original warm reddish-brown surface of Bronze develops through weathering. A brown-red surface oxidation with a brown-grey undertone is typical for this alloy; the material then gradually changes to dark brown anthracite throughout.

The façade details were developed in close coordination with the bronze suppliers, with attention to detail on panel joints, openings and corners

Horbury Crescent | Notting Hill

This complete refurbishment of a Victorian terraced home in the Notting Hill Conservation Area in London was finished in 2006.

A contemporary glazed two storey garden extension brings light deep into the plan.

The strong horizontal planes to the building elevations tie the main building volumes together and shade the large areas of glazing that maximise the views around the site.

halebrown architects

Clare Hill | Esher

This 9,500sqft family house and covered swimming pool is on a site within a private Arts & Craft estate in Esher.

The brief was for this family house to have a modern, contemporary aesthetic, but tight planning restrictions required the use of a restricted palette of materials.

The resulting materiality using Petersen bricks and clay tile-clad overhanging eaves results in a striking aesthetic that sits comfortably in it's context.

Trinity Road | SW London

Hale Brown has completed this and complete renovation and rear extension to a family home in Wandsworth, South West london.

trinity road | sw london

halebrown architects

Clarendon Road | SW London

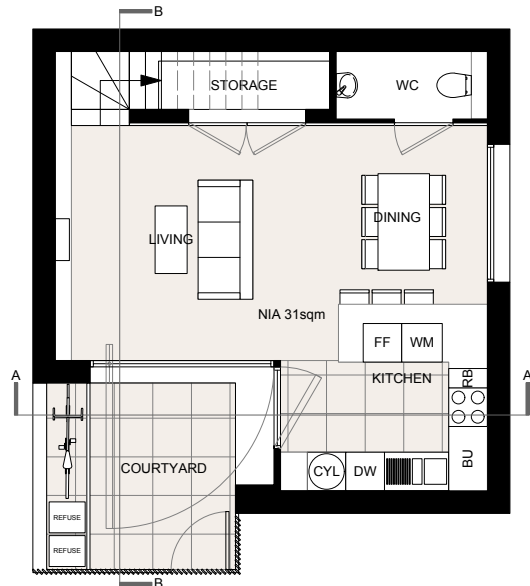

Hale Brown have submitted a planning application for this compact, detached 1-bedroom house in Merton.

The single-aspect design provides a spacious living room/kitchen to the ground floor, overlooking a small courtyard, with bedrooms to the upper floor.

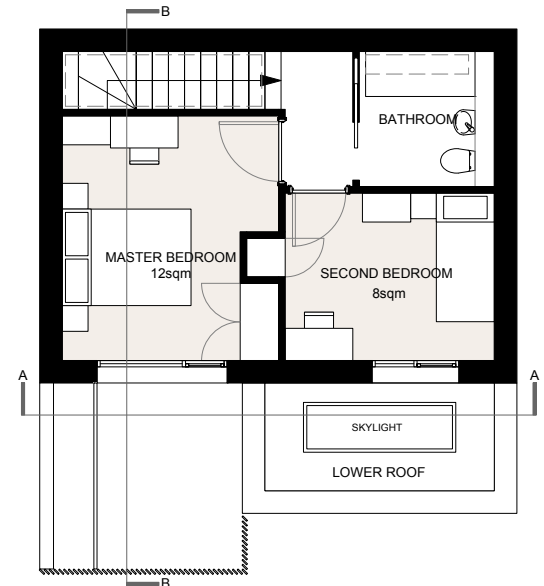

Hand-made brick is to be used externally to clad the house with solid, pre-fabricated timber panels internally, providing a simple palette of materials.

Oxshott Rise | Cobham

This 10,000 sqft luxury family home for a private client on the Oxshott Way Estate, was completed in July 2013.

The design blends high-specification traditional and contemporary materials into a series of stunning spaces. The main grand entrance hall and staircase lead into a series of open plan spaces at ground floor, that flow into each other and the external landscape beyond.

Fairmile Lane | Cobham

This 5,750 sqft luxury family home for Aspire Property Developments was completed in August 2012.

The design blends high-specification traditional and contemporary materials into a series of stunning spaces. The main grand entrance hall and staircase lead into a series of open plan spaces at ground floor, that flow into each other and the external landscape beyond.
