[Status](#) | Completed 2016

[Size](#) |

Following the success of Kew Road, HBA have completed our second Low Carbon Workplace project, with Stanhope in March 2016.

The project involved the refurbishment and extension of a 27,000sqft corner office building, in Shoreditch.

Usable floor space has been increased by over 10% with a new zinc-clad top floor and new mezzanine floors. The reception is clad in curved timber to reflect the old use of the building, as a factory for roll-top desks.

New Crittal windows and intelligent servicing helped the building achieve a BREEAM 'Excellent' rating

New south-facing roof terrace

Exposed brick piers and feature pendant lighting
